The following listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended): A stealth craft having several essentially plane external surfaces (13a-d), at least some of these external surfaces being arranged to incline towards each other so as to meet in an outer edge (12), characterized in that the outer edge (12) is divided into at least a first outer edge section (12a) and a second outer edge section (12b), which first and second outer edge sections (12a, 12b) extend along a respective essentially straight line as seen in a lateral view of the craft, at least one part of the first outer edge section (12a) and one part of the second outer edge section (12b) forming part of an outer periphery line (18) of the craft as seen in a planar view of the craft from the upside or underside of the craft, and that a first point (16a) of the first outer edge section (12a) is connected to a second point (16b) of the second outer section (12b) via a fold (17) arranged in the exterior of the craft, said points (16a, 16b) being located on mutually different levels as seen in a direction perpendicular to said planar view.

Claim 2 (Currently amended): A stealth craft according to claim 1, <u>characterized</u> in that the <u>a first</u> angle (v_1) between the fold (17) and the first outer edge section (12a) is acute, as seen in a lateral view of the craft, and that the <u>a second</u> angle (v_2) between the fold (17) and the second outer edge section (12b) also is acute, as seen in a lateral view of the craft.

Claim 3 (Currently amended): A stealth craft according to <u>claim 1</u> anyone of the preceding elaims, <u>characterized</u> in that the craft constitutes an aircraft.

Appl. No. TBD

Amdt. dated October 18, 2004

Claim 4 (Currently amended): A stealth craft according to claim 3, <u>characterized</u> in that the craft comprises a main wing (14), the <u>an</u> outer edge (15) of which forming of the first outer edge section (12a).

Claim 5 (Currently amended): A stealth craft according to claim 4, <u>characterized</u> in that the craft comprises a nose wing (24), the <u>an</u> outer edge (25) of which forming part of the second outer edge section (12b).

Claim 6 (Currently amended): A stealth craft according to claim 4, <u>characterized</u> in that the craft comprises a stabilizer (34), the <u>an</u> outer edge (35) of which forming part of the second outer edge section (12b).

Claim 7 (New): A stealth craft according to claim 2, <u>characterized</u> in that the craft constitutes an aircraft.

Claim 8 (New): A stealth craft according to claim 7, <u>characterized</u> in that the craft comprises a main wing, an outer edge of which forming of the first outer edge section.

Claim 9 (New): A stealth craft according to claim 8, <u>characterized</u> in that the craft comprises a nose wing, an outer edge of which forming part of the second outer edge section.

Claim 10 (New): A stealth craft according to claim 8, <u>characterized</u> in that the craft comprises a stabilizer, an outer edge of which forming part of the second outer edge section.

Claim 11 (New): A stealth craft comprising:

a plurality of surfaces disposed on an external surface of the stealth craft wherein at least one surface is oriented towards at least one other surface thereby forming at least one outer edge, the at least one outer edge including first and second outer edge sections;

an outer periphery line extending along at least a portion of the stealth craft wherein at least a portion of the outer periphery line is formed by the first and second outer edge sections;

a first point located on one end of the first outer edge section and a second point located on one end of the second outer edge section; and

a fold disposed on an exterior of the stealth craft extending between the first and second points wherein the first point is laterally and longitudinally spaced apart from the second point.

Claim 12 (New): The stealth craft of claim 11, further including a first angle and a second angle wherein the first angle is formed by the intersection of the first point and the fold, and the second angle is formed by the intersection of the second point and the fold.

Claim 13 (New): The stealth craft of claim 12, wherein the first and second angles are acute angles.

Appl. No. TBD

Amdt. dated October 18, 2004

Claim 14 (New); The stealth craft of claim 11, wherein the stealth craft is an aircraft, the

aircraft including a main wing.

Claim 15 (New): The stealth craft of claim 14, wherein the main wing includes an outer edge

that forms at least a portion of the first outer edge section.

Claim 16 (New): The stealth craft of claim 14, further including a nose wing having an outer

edge wherein the outer edge of the nose wing forms at least a portion of the second outer

edge section.

Claim 17 (New): The stealth craft of claim 14, further including a stabilizer having an outer

edge, the outer edge of the stabilizer forming at least a portion of the second outer edge

section.
